

Common Vision for Growth

A common vision for moving the Commonwealth to a prosperous and healthy future:

- Building 10,000 multi-family homes a year through 2020, particularly near transit, city/town centers and employment centers;
- Shifting the way we travel, by tripling the share of travel by bicycling, transit and walking;
- Reducing greenhouse gas emissions 25% from the 1990 levels by 2020.
